

GLYCAN-4fx™

*The Evolution of Mobility Science.**

Welcome to the next generation of mobility support! We know that staying active and moving with confidence is essential to living your best life. That's why we created **TruEdge Glycan-4fx** — a science-forward, multi-glycan daily supplement designed to support flexibility, connective tissue health, and Joint comfort.* Whether you're an active ager looking to maintain your daily routine or someone focused on optimizing physical performance, this FAQ will help you understand how Glycan-4fx works and why it's the evolution of mobility science.*

Q1. WHAT MAKES GLYCAN-4FX CAPSULES DIFFERENT FROM TRADITIONAL JOINT SUPPLEMENTS?

For years, many joint supplements have relied on basic building blocks like glucosamine and chondroitin. While helpful, these traditional ingredients often take 30 days or more to show results.

Our Glycan-4fx supplement takes a completely different approach. It goes beyond traditional joint support by focusing on the structural foundation of your body's connective tissue.* Powered by a patent-pending† blend of a proprietary fish collagen complex and sunflower-sourced phosphatidylserine, Glycan-4fx is scientifically shown to support physical activity and mobility in as little as 4 days.* It's about supporting your body's natural collagen network so you can feel the difference fast.*

Q2. HOW QUICKLY WILL I FEEL A DIFFERENCE?

Because of its advanced, patent-pending collagen/proteoglycan complex, Glycan-4fx is designed for rapid support. It is scientifically shown to support physical performance and mobility in as little as 4 days.* It has also been shown to help improve joint comfort in as little as 1 week,* and in scientific studies, the key ingredients were scientifically shown to improve joint comfort by 31% in 30 days.* For the best results, consistent daily use is key!

Q3. WHAT ARE THE KEY INGREDIENTS, AND HOW DO THEY WORK?

The Glycan-4fx supplement features a "Power Trio" of scientifically studied ingredients that work together to support your mobility.* See the table below for a breakdown of each ingredient and its role.

| INGREDIENT | THE ROLE | WHY IT MATTERS |
|--------------------------------------|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Proprietary Fish Collagen Complex | The Structural Architect | This high-purity complex contains proteoglycans—which are structural components of connective tissue. It supports your body's natural collagen network and helps maintain connective tissue integrity.* |
| Sunflower-Sourced Phosphatidylserine | The Stress Adaptor | This plant-derived, soy-free ingredient helps your body adapt to physical stress. It supports overall physical performance, making it ideal for active individuals.* |
| Manapol® (Aloe Vera Inner Leaf Gel) | The Glycan Advantage | As the world's purest Aloe vera extract, Manapol® provides foundational support for cellular health and overall well-being.* |

* These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

Q4. I LOVE BOUNCEBACK®. DO I STILL NEED IT IF I TAKE GLYCAN-4FX?

Yes! Our Glycan-4fx and BounceBack® supplements are actually designed to be the perfect pair. They work together as a complete, two-tier mobility system to help keep you moving comfortably.*

Think of it this way: BounceBack® is your recovery support — it helps your body's natural response to physical stress and supports post-activity recovery.* Glycan-4fx is your structural support — it works on the architecture of your joints, the connective tissue, cartilage, and collagen network.* If you love the post-activity benefits of BounceBack®, adding Glycan-4fx provides the long-term structural integrity support your joints deserve.*

Q5. HOW DO I TAKE GLYCAN-4FX™?

Simply take 2 capsules daily, with or without food. Make it a part of your daily routine to help maintain joint health and resilience.* For complete two-tier mobility support, consider pairing Glycan-4fx with BounceBack® to combine structural support with post-activity recovery support.*

Q6. DOES GLYCAN-4FX™ CONTAIN ANY ALLERGENS?

Yes. Because the proprietary collagen complex is sourced from sturgeon, Glycan-4fx contains fish. It is not suitable for individuals with fish allergies. However, the formula is gluten-free, dairy-free, and uses a non-soy, plant-derived source of phosphatidylserine.

Q7. HOW DOES GLYCAN-4FX™ SUPPORT HEALTHY AGING?

Mobility is a factor that can promote longevity.* Staying active is one of the most important things you can do for a healthy lifespan. By supporting flexibility, ease of movement, and the structural integrity of your cartilage, Glycan-4fx helps maintain the mobility you need to stay active as you age.* It's designed to give you the movement confidence to keep doing the things you love.*
